The prefecture's tea business communication No714

issued in 12th January 2012 by Sizuoka prefecture tea business association.

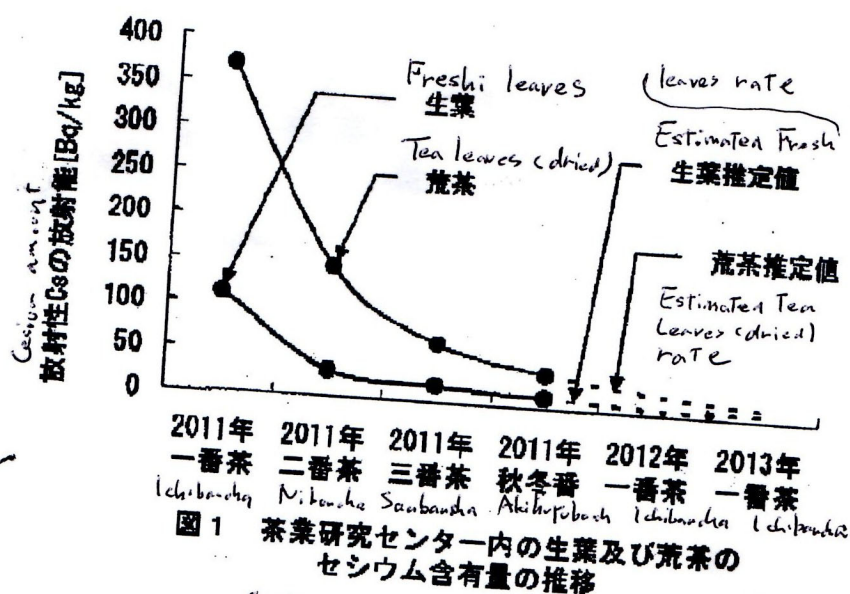

Safety and security of tea in Sizuoka prefecture in 2012

The tea garden in Sizuoka prefecture was controlled and technically managed sweepingly so that the radioactive of teas in Sizuoka prefecture is supposed to be extremely low. (the rate is tea leaves and it was not subject to regulation from April 2012 the subject to the regulation from April is brewed tea)

The cesium amounts of the tea leaves in the tea garden of Sizuoka prefecture tea research center in Kikukawa-shi was Ichibancha (the first flush tea in 2011) was 370Bq/kg and the Nibancha (second crop'(flush) tea)was 146Bq/kg and the 3rd (crop) flush tea in 2011) was 38Bq/kg and Akuhuyubancha autumn crop of made tea was 38Bq/kg.

The change of cesium amount in tea leaves in terms of periods passing in 2011

Terms(priod)	Fresh leaves	Tea leaves (dried leaves)	Ratio to ichbancha
Ichibancha	111Bq/kg	370Bq/kg	100%
Nibancha	29Bq/kg	146Bq/kg	39%
Sanbancha	18Bq/kg	66Bq/kg	18%
Akihuyubanncha	12bq/kg	38Bq/kg	10%

Cesium amount of Fresh leaves and Tea Leaves in tea research center's change of times
